

Intense

Color tone with primers

A warm tone, but with a touch of beige is a perfect choice for a room that needs to feel cozy and inviting. It can help create an atmosphere of relaxation, while still maintaining a classic look. The muted shade has enough warmth to make the space feel inviting without being too bright or overwhelming. A tone that not only adds beauty and an intense depth to any space, but also helps to create a sense of harmony and balance.

**The treatment is done on white oak floors and can vary in tones and look depending on what type of wood and condition of the floor.*
