

Natural

Color tone with primers

A natural tone on your floor can bring a feeling of warmth and comfort into your home. This tone gives the fives more freedom of being creative to add more color into the interior, while the tone of the floors stays natural. This tone will age gracefully with time, giving your home an aged and sophisticated charm.

**The treatment is done on white oak floors and can vary in tones and look depending on what type of wood and condition of the floor.*
