

White

Color tone with primers

The white pigment in this tone provides a Nordic light and creates space and air in the room. It's both fresh, bright, and modern and gives the freedom of being creative with interior design. This light, cooler, but natural tone provides a unique and sophisticated edge to any home. This tone is perfect for creating a calming and serene environment.

**The treatment is done on white oak floors and can vary in tones and look depending on what type of wood and condition of the floor.*
