

# Sand

## Deepen the feeling with coloured oil

This sandy colour contains a hint of white pigment that gives a neutral, Nordic, and light tone. It is both elegant and understated but at the same time creates a modern feel in any living space. This light shade can add a sense of airiness that opens the room. Its versatile nature makes it adaptable to a wide range of design styles, from minimalist to rustic and traditional. It gives a feeling of a calm and relaxing environment.

*\*The treatment is done on white oak floors and can vary in tones and look depending on what type of wood and condition of the floor.*
