Over 100 Years of Innovative Floor Solutions

A Century of Trust, Decades of Innovation: Bona Leads the Future of Floors

At Bona, we are passionately developing innovative solutions for everything we do and have pioneered innovations in wood floor care since the 1970s with the introduction of the first waterborne floor coatings. By leveraging years of expertise, we have introduced dust-free sanding and a unique system for upgrading and maintaining floors, beyond hardwood, with significant cost-

saving and lower downtimes, the Bona Facility Solutions. And are proud to offer a comprehensive range of high-performing products and systems by focusing on floorcare professionals.

An Essential Solution

The Bona Resilient System is an innovative, highly effective solution for upgrading old, worn resilient floors. It refreshes surfaces quickly and cost-effectively, saving time, minimizing disruption, and delivering long-lasting results.

A World of **Design Possibilities**

Restore floors with color and design options that offer total transformation.

Restore and Add Color

Whether it's the replacement of worn markings on a sports floor, or a timely interior design update, the Bona Resilient System offers a complete range of base colors and decorative color chips to choose from to transform a space.

Design Possibilities

Achieve a fresh look to worn floors with the Bona Resilient Solution, offered in six base colors and six premium color chip options provides limitless opportunities.

For Challenging Situations

Thanks to the outstanding flexibility of the Bona Resilient System, uneven surfaces and hard-to-reach areas, such as stairs, corners and round studded floors are no longer a challenge.

Transform Worn Floors

With six base colors and six premium color chip options, the floor design and transformation possibilities are endless. From restrooms to hallways to community rooms, cafeterias or gyms, the Bona Resilient System offers full floor transformation without replacing the floor.

Bona Pure Color is a uniquely engineered, two-component, waterborne product that is heavily pigmented which allows for a single-coat coverage. This formula ensures an ultra-quick drying process.

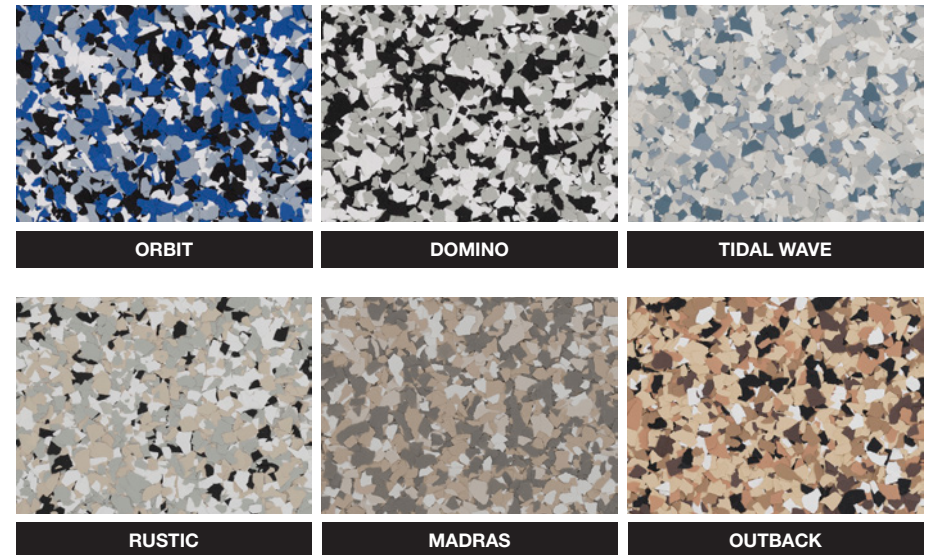

Couple your Bona Pure Color with Bona Premium Color Chips, that can be applied in varying weight. You can add design and durability to the floor, extending the life and reducing the maintenance for years to come.

A Game Changer in Resilient Floor Renewal

Different floors come with different types of challenges. Busy airport terminals or hotel hallways with heavy foot traffic, and hospitals or educational facilities with strict hygiene demands, require uniquely tailored solutions for long-lasting results. Bona's Resilient System is a simple process, developed by professionals for professionals, to deliver an effective renewal solution to reduce cost and extend the life of your floors.

- ✓ **Unique offering in resilient floor color transformation**
- ✓ **More cost effective over the life of the floor than replacement**
- ✓ **Less downtime so floors can be put back in service faster**

Save on Labor Hours and Downtime

Arizona-based Havasu Regional Medical Center needed to update its resilient flooring. The facility sought a cost-effective solution to renew and improve operating room floors with minimal downtime.

The resilient 4-hour renewal process cost the medical facility only 18 total hours of downtime, compared to standard new floor installation of 72 hours or more. The benefits of the Bona Resilient System are clear. It is unique and innovative, highly effective solution for upgrading old, worn resilient floors. It refreshes surfaces quickly and cost-effectively, saving time, minimizing disruption, and delivering long-lasting results., allowed for beautifully updated floors, without a messy, expensive, or time-intensive removal process and up to 75% total cost savings.

- ✓ Less Mess
- ✓ Less Downtime
- ✓ More Cost Savings

Less Downtime

Rather than tear out the existing floor, an expensive and wasteful process, the Bona Resilient System fully renewed the surface in less time*, and the floor never needs to be stripped or polished again!

**Results stated are from this specified case study.*

The Process: Arizona-based Havasu Regional Medical Center Renewal

Amazing Results with Bona

Bona's unique, easy-to-use resilient floor solution creates exciting new looks with stunning results and high durability. Here are some recent upgrades.

Retail

Goodwill needed flooring updates across various retail locations. Floor replacement, which at first they thought was the only option, meant a two to three week disruption to the Goodwill showrooms. Bona stepped in with the

Bona Resilient System, and fully renewed the Goodwill floors in hours rather than weeks.

Education

These educational facilities decreased downtime while also receiving hands-on training for the on-site facility operations team. The school employees now have new skills and never need to strip or polish the floors again.

Top Benefits of the Bona Resilient System

TIME SAVINGS

Achieved through reduced downtime compared to replacing the floor. While creating a surface that requires less maintenance compared to traditional stripping and polishing methods. Giving facility teams time back to focus on other areas in the building.

COST SAVINGS

The facility will realize exponential cost savings vs replacing the floor along with being compared to traditional polish/maintenance methods. There can also be significant labor savings by doing the upgrade process in-house vs. having to hire a flooring contractor.

DURABILITY

High resistance to many common chemicals, including heavy duty disinfectants and hand sanitizer. The Bona Resilient System creates a monolithic surface that seals cracks and seams - keeping dust, dirt and contaminants at the surface so they can be easily and effectively removed during routine cleaning.

LESS WASTE

Once the process is completed, floors never need to be stripped, burnished or polished again! Reducing both downstream waste from stripper solution and landfill waste from depositing old resilient flooring during replacement. The entire resilient line of products are waterborne and GREENGUARD certified, meeting stringent regulations for indoor air quality.

CLEANER FLOORS

Clean floors are vital for facilities. The Bona Resilient System seals floor surfaces to protect from the contaminants that can thrive in cracks and seams. This allows for cleaning solutions to be more effective at keeping the surface free from dirt and build-up.

“ The biggest difference between the way they repair floors now and the Bona method is expediency, appearance, compliance and money... I would 100% recommend Bona to anyone working in a hospital. ”

- Mark Mayberry, Security and Emergency Management Coordinator

Prep

Give damaged and heavily worn floors a new lease on life with Bona's effective and straightforward process. Achieve the perfect flooring surface in a matter of hours without the downtime, cost, or inconvenience of installing a new floor. Dramatic makeovers, color changes and full renewals can be easily achieved with stunning results.

Prep Process

The Bona Resilient System extends the life of floors and reduces the disposal of non-biodegradable material waste which typically ends up in landfills. Once the upgrade is complete, never strip or polish the floor again!

STEPS:

Strip and rinse floor using a floor finish stripper designed to remove commercial acrylic floor finish, polish or wax. Remove all the wet stripping solution with a vacuum or autoscrubber.

Wet abrade the floor with clean water, using the Bona FlexiSand DCS® Buffer, Bona® MultiDisc, and Bona Diamond abrasives.

Clean the floor with an auto scrubber followed by a final wet mop using the Bona Pro Series Mop and Microfiber Cleaning pad preparing the floor for color.

Recoat

Color Upgrade Plus Added Durability

Once the floor has been stripped and old polish is removed, the floor is ready for the new color and chip design. Choose from six base colors and six premium color chip options to customize the floor. Once the color upgrade is complete, the floor is ready for two quick coats of finish. The two-component, high durability, waterborne polyurethane clear coat helps extend the life of the floor for years to come. Thanks to the Bona Resilient System, resilient floor renewals are only hours away!

Design
and
Durability

STEPS:

1

Apply Bona Pure Color.

For all color options see **Design page**.

2

As the base color is being applied, a second person applies an even layer of Bona Premium Color Chips.

For all color options see **Design page**.

3

Lastly, use two coats of Bona Pure HD Resilient Floor Clear Coat to complete the job and ensure maximum durability.

Solutions that Make it Happen

Bona® Diamond Discs

The ultimate selection for floor prep and resilient abrasion. Long lasting diamond discs will give a consistent abrasion to the resilient floor leaving the best surface possible for optimal adhesion.

- Improves adhesion for color and clear resilient coatings
- Lasts up to 4000 sq. ft.*

**stripping ~1000 sq. ft., wet abrading 3000-4000 sq. ft.*

Bona FlexiSand DCS® Buffer

Engineered for performance, convenience, durability, unequaled power and superb balance.

- Low-deck height for access to hard-to-reach places
- Hydraulically adjustable handle height

Bona® Multidisc

Innovative drive plate creates the perfect surface for a Bona transformation system. The discs spin independently of each other, all but eliminating swirls and scratch marks, leaving the floor smooth and flat.

- Consistent scratch pattern
- Improves adhesion for recoating

Bona® Floor Repair

Bona Floor Repair is a 2-component filler and adhesive for repairing cracks and small voids for VCT, LVT and other resilient flooring material.

- Fast curing speed and strength of bond
- Easy to sand
- Excellent sag resistance

Bona® Dispensing Bucket

Provides a smooth and consistent amount of product without the struggle of pouring out of cumbersome buckets and pails. Great for cleaners, strippers and finishes!

- 10 gallon capacity
- Highly maneuverable
- Easy flow valve

Bona® Pure Seal

Bona Pure Seal is specially formulated to reduce the need for additional coats of color. This formula is designed to lessen the appearance of seams and cracks on resilient surfaces creating a seamless and durable look across the floor.

- Ultra-quick drying for minimal downtime
- Lowers need for multiple coats of color
- Lessens the appearance of seams and cracks

Bona® Pure HD

Specifically formulated for resilient floors, offers an extremely durable and long lasting coating for heavy traffic areas. Restores appearance and simplifies routine maintenance. Available in Satin and Gloss.

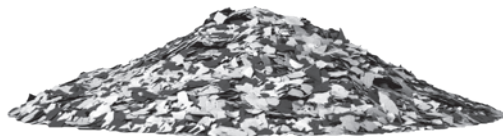

- Strong resistance to common disinfectants
- Ultra-quick drying for minimal downtime
- Optimal application and leveling properties

Bona® Pure Color

A uniquely formulated product for the transformation of resilient floors. Ensures a quick application process with accelerated drying properties and heavy pigmentation for single-coat coverage.

- Heavily pigmented for excellent hide
- Ultra-quick drying for minimal downtime
- Available in six base colors

Bona® Premium Color Chips

Achieve unique and beautiful design effects when transforming resilient floors. The six color chip options provide a wide array of custom color combinations.

- Easy to apply
- No extra time needed during the coating process

Bona® AntiSlip Additive

Achieve additional slip protection when added to Bona Pure HD without additional time during the coating process. One bag (5.3 oz.) treats one gallon of topcoat.

- Provides improved slip resistance
- Clear, polypropylene grain that won't affect floor color.

Microfiber Roller

For easy application and uniformity of Bona Pure Color, Bona Pure Seal and Bona Pure HD.

- Smooth and consistent application
- Microfiber holds product better and retains shape
- Lint-free
