

Suitable for:

- ✓ Wood
- ✓ Stone
- ✓ Metal
- ✓ Concrete

Bona **VERTICAL**

QUICK AND EASY INSTALLATION

Bona Vertical

CONSTRUCTION ADHESIVE

Bona Vertical is the new generation of construction adhesives with extremely high initial bonding strength and fast setting speed for quick and easy installation. The construction adhesive can be applied to a variety of substrates and materials such as wood, stone, metal and much more. It is also suitable for many bondings including plastics. This makes Bona Vertical very versatile and, for example, excellent for repair work and the gluing of skirting boards, wall moldings and stairs. By spraying small amounts of water on the substrate (subfloors, walls, etc.) or the applied adhesive the setting process can be further accelerated.

A WIDE RANGE OF APPLICATIONS

- Wood and wood materials
- Mineral materials such as stone, ceramic, natural stone
- Cement-based materials
- Calcium sulphate (anhydrite, gypsum) based floors / walls
- Cleaned metal surfaces
- Many plastics (PVC, rubber, PU, PS)

KEY BENEFITS

- Very good adhesion to almost all types of substrates and wood-based materials
- Extremely fast setting, can be accelerated during application
- Very high initial bonding strength (approx. 300 kg/m²)
- Free of water and solvents

TECHNICAL DATA

Base:	Silane modified prepolymer
Color:	Beige
Open time:	approx. 10 min
Application of load:	after approx. 4-8 hours
Curing time:	2.8 mm / 24 hours.

Bona Vertical - perfect for gluing skirting boards
