Tubular bag size: 4.5 kg (62.5 mm diameter)
Nozzle: PVC adhesive nozzle with teeth 1250 F [TKB B12] (optionally available 850 F)
Material piston: POM-DELRIN
Application width: 250 mm
Adhesives: Bona silane adhesives in 4.5 kg foil bag
Battery: 18 V 2 A, Li-ion

Instructions for use

Prepare Bona OptiSpread 2.0 in accordance with the instructions provided in the operating manual. Fit the 4.5 kg tubular bag and nozzle as described in the manual. Place the applicator on the floor with the nozzle head positioned correctly, switch on the unit and apply the adhesive while walking backwards. The amount of adhesive applied depends on the selected nozzle size, feed rate and walking speed.

Detailed product information is provided in the operating manual.

Subfloor Preparation

Bona OptiSpread 2.0 is intended for use with 4.5 kg tubular bags of Bona silane adhesives. Subfloor preparation, working times and application conditions may vary depending on the adhesive. Always observe the Technical Data Sheet for the specific Bona adhesive being used.

The information in this document and all other advice and recommendations that we provide to help and assist the applicator are based on previous experience and extensive testing but make no claim to be complete. Because of the wide range of possible uses and conditions of application of our products, we do not relieve users from the need to carry out their own trials or to seek technical advice from Bona before use. Bona can only guarantee its products and not the construction as a whole. Observe the recommendations from the flooring manufacturer and the provisions of relevant standards.
