Bona Expansion Strips

SELF-ADHESIVE 50 MM FOAM EXPANSION STRIP

Self-adhesion foam strip to avoid sound bridges between levelling compounds and building parts.

Bona Expansion strips 50 is a self-adhesive foam strip used for avoiding sound bridges between levelling compounds and building parts.

- For levelling compound and thin screeds
- Self-bonding, quick and easy to install
- Avoids acoustic bridges
- Remains straight on the wall

TECHNICAL DATA

Product type / base:	Self-adhesive PE-Foam with fleece backing and fleece socket.
Storage/Transport:	Store and transport in a dry place. Protect from moisture and direct sunlight.
Disposal:	Dispose of offcuts and packaging in accordance with local regulations. Clean PE foam offcuts may be recyclable where facilities exist; otherwise dispose of as non-hazardous construction waste.
Pack size:	20 metre roll.

Bona Expansion Strips

SELF-ADHESIVE 50 MM FOAM EXPANSION STRIP

APPLICATION INSTRUCTIONS

Vacuum the subfloor thoroughly before installation to ensure good adhesion. Remove the release film from the self-adhesive strip and press the strip firmly onto the subfloor along walls, columns and other fixed upstands. Apply firm pressure to ensure full contact; for best results, use a hand roller to press the self-adhesive strip firmly onto the subfloor. At inner corners, make a cut in the foam to allow the strip to fold neatly. At outer corners, make a cut in the fleece so the strip can wrap around the corner. Where required, cut through the self-adhesive strip to maintain a flat, well-bonded fit. After the levelling compound has been applied and fully cured, trim off any excess strip material flush with the finished surface.

The information in this document and all other advice and recommendations that we provide to help and assist the applicator are based on previous experience and extensive testing but make no claim to be complete.
Because of the wide range of possible uses and conditions of application of our products, we do not relieve users from the need to carry out their own trials or to seek technical advice from Bona before use. Bona can only guarantee its products and not the construction as a whole. Observe recommendations from the flooring manufacturer and the provisionsof relevant standards.
