RETHINK RESILIENT FLOOR REPLACEMENT BONA RESILIENT SOLUTION

Introducing the Bona Resilient Solution. An innovative, sustainable and highly effective system to renew and extend the life of linoleum, PVC, vinyl, PU, rubber or LVT floors.

New flooring, rising labor rates and installation is an expensive endeavor, and many budgets don't allow for that cost these days. Keeping your facility up and running while maintaining your budget is one of your top priorities and Bona can help. Finding an effective alternative to save money on time, labor and materials is a responsible solution and a way to optimise your multi year maintenance plan. Floor renewal is a new yet quick and simple alternative to achieve your goal to update a space or completely transform it without a major capital expense.

40% COST SAVINGS

Transform old, worn resilient floors without having to endure the high cost and time of replacing them. On average, the renewal of a resilient floor works out to be at least 40% less expensive compared to installing a new floor.

COST SAVINGS BENEFITS OF FLOOR RENEWAL

- No need to remove heavy equipment
- Materials on average cost 90% less
- Eliminates demolition and disposal

Rather than tear out the existing floor, the Bona Resilient Solution renewed the floor with only a tenth of the cost of floor replacement.

CASE STUDY - Sport floor renewal

At Bishop Walsh Catholic School in Birmingham, England, the Taraflex vinyl sports floor had become worn and needed to be replaced. Due to the very high cost of replacement, the decision was made to employ Biddle Sport, a specialist sports flooring company trained in the use of the Bona Resilient Solution to renew the surface. Working in partnership with the Bona technical team the total refurbishment of the floor was completed for half the cost of replacing it with a new floor. The complete renewal of Bishop Walsh's vinyl sports floor was achieved in just five days.

FACILITY COSTS ON THE RISE

RENEWING WITH THE BONA RESILIENT SOLUTION OFFERS THE FOLLOWING **ADVANTAGES OVER REPLACING:**

- Significant downtime savings
- Substantial cost savings
- Considerable carbon footprint reduction
- Limitless design customization
- Improved durability attributes
- Enhanced hygiene properties

RETHINK RESILIENT FLOOR REPLACEMENT

Renew and extend the life of the floor with a new durable surface using only the clear coat solution or transform the floor completely, adding endless design customization with the colour coat solution.
